PROJECTS

Advanced Password-Activated Smart Door Locking System |

- About Project **Developed an Advanced Password-Activated Smart Door Locking System: Engineered to Provide Enhanced Security and User-Friendly Access Control.**

E-commerce responsive website |

- About Project **using HTML, CSS and JavaScript we have developed a responsive website which contains registration and login page. I spearheaded the development of a comprehensive eCommerce website project, leading a multidisciplinary team to achieve business objectives effectively. In my role, I took charge of both design and development aspects, leveraging technologies such as Shopify and custom HTML/CSS to create a visually appealing and highly functional platform.**

Portfolio |

- About Project **I have developed an response portfolio using HTML, CSS and JavaScript. In my portfolio, I showcase several impactful projects that demonstrate my expertise and proficiency across various domains. One notable project involved the development of a robust mobile application aimed at revolutionizing task management for professionals. As the lead developer, I oversaw the entire project life cycle, from conceptualization to deployment, employing agile methodologies to ensure timely delivery and adherence to client specifications**
